

TOP CLIENT-RATED PAYER TECHNOLOGIES

CLOUD-BASED DATA PLATFORM SOLUTIONS

Survey Period: Q3 2022 – Q2 2023 | Published: June 2023

Black Book™ annually evaluates leading health care/medical software and service providers across 18 operational excellence key performance indicators completely from the perspective of the client experience. Independent and unbiased from vendor influence, more than 1,200,000 healthcare IT users are invited to contribute to various annual customer satisfaction polls. Suppliers also encourage their clients to participate to produce current and objective customer service data for buyers, analysts, investors, Vendors, competitive suppliers, and the media. For more information or to order customized research results, please contact the **Client Resource Center at +1 800.863.7590** or **Research@BlackBookMarketResearch.com**

Survey Overview

From Q3 2022 through Q2 2023, the Black Book Research payer IT client/user survey investigated 143 vendors utilized by 7,606 validated IT users nationwide for final satisfaction rankings.

With more than 900 health insurance companies operating throughout the United States, there are many payers in play throughout the industry. These companies offer 67.3% of private health care and 34.4% of public health care, respectively, through their health plans. **Over 16% of all health insurers were represented in the 2023 Black Book managed care and health plan IT surveys.**

Black Book Methodology

How the Data Sets are Collected

Black Book collects ballot results on 18 performance areas of operational excellence to rank vendors by electronic medical and health record product lines. The gathered data are subjected immediately to an internal and external audit to verify completeness and accuracy and to make sure the respondent is valid while ensuring that the anonymity of the client company is maintained. During the audit, each data set is reviewed by a Black Book executive and at least two other people. In this way, Black Book's clients can clearly see how a vendor is truly performing. The 18 criteria on operational excellence are subdivided by the client's industry, market size, geography and function outsourced and reported accordingly.

Situational and market studies are conducted on areas of high interest such as e-Prescribing, Health Information Exchange, Accountable Care organization, hospital software, services providers, educational providers in e-health, bench markers and advisors. These specific survey areas range from four to 20 questions or criteria each.

Understanding the Statistical Confidence of Black Book Data

Statistical confidence for each performance rating is based upon the number of organizations scoring the electronic medical and health records service. Black Book identifies data confidence by one of several means:

- Top-10-ranked vendors must have a minimum of ten unique clients represented. Broad categories require a minimum of 20 unique client ballots. Data that are asterisked (*) represent a sample size below required limits and are intended to be used for tracking purposes only, not ranking purposes. Performance data for an asterisked vendor's services can vary widely until a larger sample size is achieved. The margin of error can be very large, and the reader is responsible for considering the possible current and future variation (margin of error) in the Black Book performance score reported.
- Vendors with over 20 unique client votes are eligible for top 10 rankings and are assured to have highest confidence and lowest variation. Confidence increases as more organizations report on their outsourcing vendor. Data reported in this form are shown with a 95% confidence level (within a margin of 0.25, 0.20 or 0.15, respectively).
- Raw numbers include the quantity of completed surveys and the number of unique organizations contributing the data for the survey pool of interest.

Who Participates in The Black Book Ranking Process

Over 7,000 payer technology users ranking from health plan executives, clinicians, IT specialists and front-line implementation veterans are invited to participate in the 2023 annual Black Book initiative satisfaction survey. Non-invitation receiving participants must complete a verifiable profile, utilize valid corporate

email address, and are then included as well. Independent validation firms are employed by Black Book to ensure the highest quality responses are included in the resulting ratings and formats.

The Black Book survey web instrument is open to respondents and new participants each year at <http://blackbookrankings.com> and mobile applications from iTunes and Google Play. Only one ballot per corporate email address is permitted and changes of ballots during the open polling period require a formal email request process to ensure integrity.

The online survey instruments are powered by and managed collectively by Qualtrics®.

The members of 18 professional healthcare associations, 9 media outlets and returning participants with previous identification verifications are among those invited to surveys. Individuals and provider management can register as new participants on mobile applications and online polling instruments. Ballots are validated through two independent survey verification services software companies before being included in the scoring process.

5	1	Name	8.49	8.63	8.50	8.01	8.66

Source: Black Book Research

- **Overall rank** – this rank references the final position of all 18 criteria averaged by the mean score collectively. This vendor ranked fifth of the 20 competitors.
- **Criteria rank** – refers to the number of the question or criteria surveyed. This is the sixth question of the 18 criteria of which this vendor ranked first of the 20 vendors analyzed positioned only on this criteria or question. Each vendor required ten unique client ballots validated to be included in the top ten ranks.
- **Company** – name of the vendor.
- **Subsections** – each subset comprises one-fourth of the vendor mean at the end of this row and includes all buyers and users who indicate that they contract each respective functional subsection with the supplier, specific to their physician enterprise.
- **Mean** – congruent with the criteria rank, the mean is a calculation of all four subsets of functions surveyed. As a final ranking reference, it includes all market sizes, specialties, delivery sites and geographies.

2. Innovation and Optimization

Q2: Customers are also continuing to push the envelope for further enhancements to which the vendor is responsive. Payer IT clients also believe that their vendors' technology is helping them manage practices more effectively, generate accurate records and reimbursement billings and cut their overhead in ways that were difficult or impossible to accomplish before technology solutions were implemented. Vendor is responsive to make client recommendations with cutting edge improvements.

3. Training

Q3: Payer IT vendor leadership provides significant and meaningful training opportunities for internal employees and client staff. Leadership strives to develop technology staff, client service and customer servicing consultant employees. Training modules are effective and practical so that minimal post-implementation training is required on or off site. Regular updates are timely and require minimal additional training to implement.

4. Client Relationships and Cultural Fit

Q4: The vendor leadership honors customer relationships highly. The relationship with the vendor elevates the customer's reputation. Improving healthcare delivery efficiency and effectiveness is a priority of the supplier. Governance of engagement is neither complex for buyer nor does it require vendor management attention regularly. There is no regular transparency or quality issue. There are no culture clashes or misfits that threaten relationship's success or client's satisfaction.

Payer Technology Solutions: CLOUD-BASED DATA PLATFORM SOLUTIONS

7. Deployment and implementation

Q7: The client deploys at a pace acceptable to the client. Technology solutions eliminate excessive supervision over vendor implementations. Vendor overcomes client implementation obstacles and challenges effectively. Technical, organizational, and cultural implementation obstacles are handled professionally and punctually. IT implementation time meets standard expectations. Implementations are efficient and sensitive to users' specific situations which may cause delays.

8. Customization

Q8: Payer IT products and process services are customized to meet the unique needs of specific practice client purpose, processes, and physician models. Little resistance is encountered when changing performance measurements as clients' needs vary. Extraordinary efforts are made to adapt and convert client special needs into workable solutions with efficient cost and time considerations. The software allows for modifications that are not costly or complex.
